DETAILED ACTION

1. Claims 1-29 are pending.

Claim Rejections - 35 USC § 102

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 1 and 4-5 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S. Patent 4,004,090 to Goto et al.
4. As to claim 1, Goto discloses a device comprising: a synchronization circuit [50] to receive a synchronization signal, the synchronization signal substantially synchronized with a data transition [col. 2, lines 12-24, and col. 3, lines 40-47], to synchronize the synchronization signal with a clock signal [11], and to generate a load signal based on the synchronized synchronization signal [col. 3, lines 44-68, and col. 4, lines 1-4]; and a ring counter [12] to receive the load signal from the synchronization circuit and to circularly propagate the load signal [col. 4, lines 1-6].
5. As to claim 4, Goto discloses a ring counter [12] to receive the load signal. By definition, a ring counter inherently comprises one or more delay elements to receive a signal and delay the signal and to output the delayed signal.

Art Unit: 2116

6. As to claim 5, Goto discloses the clock signal reflects a clock period, and each of the one or more delay elements delays the load signal for a respective period substantially equal to an integer multiple of the clock period [col. 4, lines 5-6]. Because the ring counter counts clock pulses, each individual delay element delays the load signal by a clock period; in aggregate, the delay elements delays the load signal by an integer multiple of the clock period.

Allowable Subject Matter

7. Claims 2-3 and 6-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. Claims 10-29 are allowed.

Response to Arguments

9. Applicant's arguments, see pages 10-12, filed December 1, 2006, with respect to the rejection(s) of claim(s) 1-9 under 35 U.S.C. 102(b) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of U.S. Patent 4,004,090 to Goto et al.

10. Applicant's arguments, see pages 12-14, filed December 1, 2006, with respect to claims 10-29 have been fully considered and are persuasive. The rejection of claims 10-29 has been withdrawn.
